POSIT Alert®

PowerScore™ is a powerful tool for change

PowerScore™ is a behavioral measurement system for POSIT Alert® users. It's based on the metrics that contribute to positive interactions among all users on our platform, and its purpose is to improve user experience and overall performance across our network.

A POSIT Alert trader's PowerScore is a weighted average of the following metrics measured within the POSIT Alert network.

PowerScore Components

Metrics are weighted to reflect relative importance to the user experience.

THE GOAL IS TO IMPROVE YOUR POSIT ALERT EXPERIENCE

PowerScore can act as a seal of approval for high-scoring users. It is a data driven method to proactively improve your POSIT Alert practices and become a user others trust to make quality matches.

For users with a low PowerScore, these metrics serve as a roadmap for better performance. For those with high PowerScores, we plan to offer exclusive functionality to reward their quality interaction.

By creating desirable features available to our best users, we believe we can drive an improvement in trader behavior and execution quality, benefitting all of our clients through improved firm-up rates and overall liquidity.

PowerScore Parameters

- To ensure statistical significance, only POSIT Alert users who have participated in minimum of 25 trading opportunities over the past 60 days receive a PowerScore.
- Individual traders participating in POSIT Alert as part of a multi-user team will receive a score based on their team interactions
- All interactions within the US, Canada, and Latin America factor into the score.
- Extra weight is given to recent activity, making it easier for users to improve their score in a relatively short timeframe.
- Final scores rank the raw scores of all users on a scale of 0 to 100 with 100 being the highest score and with all users evenly distributed. [Those whose PowerScore falls below 25 will see a score of 25 rather than the exact number.]
- Scores are recalculated daily.

POSIT®

Your score appears prominently on your ticket

Users with a 2015.3 front end will see their PowerScore in the upper right corner of their ticket.

POWERMATCH™: COMING SOON TO POSIT ALERT IN THE AMERICAS

When two users with high PowerScores match against one another and click 'Alive,' the POSIT Alert ticket will indicate that the users have entered a PowerMatch. The minimum order suggestion for these matches will be significantly higher than our default, depending on the ADV of that stock.

This feature will provide assurance to both sides of a PowerMatch that they are interacting with a high-quality contra and inspire confidence that a sizeable block will be executed.

ABOUT ITG

ITG is an independent broker and financial technology provider that partners with global portfolio managers and traders to provide unique data-driven insights throughout the investment process. ITG helps clients understand market trends, improve performance, mitigate risk, and navigate increasingly complex markets.
